

Estimate of Livestock Numbers:

The numbers provided here will be used to determine the system size and capacity. Under estimation of water demand may result in under sized pipes while overestimation may result in unnecessary costs. Hookup costs will be calculated based on projected water use and LPRW Policy. Please list your existing and planned livestock numbers below.

	Present		Present
Beef Cattle:		Dairy Cattle:	
Feeder Calves	<input type="text"/>	Production Cows	<input type="text"/>
Fat Cattle	<input type="text"/>	Dry Cows	<input type="text"/>
Cows	<input type="text"/>	Heifer Calves	<input type="text"/>
